DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 rejected under 35 U.S.C. 103(a) as being unpatentable over the prior art.

Regarding claims 1-2, the use of the invention's dimensions as a basis for the subsequent chemical-derived equation is not to be found in the prior art due to the limitation that the size of an invention, when compared to one of similar art, is not to be counted as a patentable feature. In the case of claims 3-4, the use of volatile solids as air fresheners, insect control odor abatement or fragrances is well known in the prior art. Therefore, it would have been obvious to one skilled in the art at the time the invention was made to have created a semi-enclosed gel system of volatile materials having dimensional ratios such that the x/y ratio of the exposed gel is greater than 1.5 and up to but not including 5.0, since such a modification would have involved a mere change in size of a component, in this case, the size of the volatile gel solid. A change in size is generally recognized as being within the level of ordinary skill in the art. See *In re Rose*, 105 USPQ 237 (CCPA 1955).

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure is as follows.

U.S. Patent No. 6,631,852 to O'Leary, disclosing a vapor-dispensing device

U.S. Patent No. 3,910,495 to Cummings et al., disclosing a dispensing container for solid air treating gel

U.S. Patent No. 2,733,956 to Wenner, disclosing a vaporizing dispenser for air treating gels
